

MDOT Project Prioritization - Sample Submission

- ✓ All projects submitted for consideration are required to have a conceptual sketch that displays and locate the projects element that are in the described in the Project Description
- ✓ Sketch should show a plan view of the project in its completed form but clearly articulate any new features that are proposed

- 1 Use aerial imagery as a base map to show existing conditions (called Satellite in Google Maps)
- 2 Include labels of street names for all relevant roads
- 3 Show all proposed improvements included in the Project Prioritization project. Clearly define all specific features, termini, location, lane configurations, and any bicycle/pedestrian elements including sidewalks
- 4 Include North Arrow & Legend
- 5 Include a Scale Bar
- 6 Provide taper lengths, turns, and storage lengths (if applicable)
- 7 Clearly note if there are any improvements that are NOT part of the Project Prioritization project (if applicable)
