**David Lapp**  
Office of People's Counsel

# Announcements

---

Kelley Blue Book ranks Maryland **6<sup>th</sup>** in a [study](#) of charging points available to EV drivers:

## Maryland

- Charging points per 100,000 vehicles: **57.8**
- Charging points per 1,000 EVs: **311.3**

# Public Comments

# State Fleet Electrification

Joe Consoli, DBM

# STATE OF MARYLAND VEHICLE ELECTRIFICATION PROJECT

---

JOSEPH CONSOLI

ADMINISTRATOR

STATE FLEET AND TRAVEL UNIT

# THE “WHY”

---

- The Governor and State Legislature have established certain expectations and mandates with regard to the integration of electric vehicles (EVs) into the State’s fleet with the ultimate goal of a fully electric fleet.
  - The Fraser-Hidalgo Bill of 2021 did not pass; however, it called for 25% of all State vehicle purchases to be EVs starting in FY-23.
  - This Bill, and other similar Bills, are expected to be discussed again in the 2022 Legislative Session with the likelihood that one will pass.
- Greenhouse gases emitted by internal combustion engine vehicles (ICE) have proven to have a detrimental affect on the environment.
- The State’s fleet consists of less than 50 EVs out of approximately 4,100 eligible vehicles
  - “Eligible vehicles” are any fleet ICE vehicles for which there is a viable EV option available on State contract

# THE “WHY”

---

- Each year, the State purchases between 400-600 vehicles. Allowing for the subtraction of non-eligible vehicles (police vehicles, trucks, etc...), the expectation is that the State will purchase 200-300 eligible vehicles yearly.
- With a starting point of 25% of all State vehicle purchases being EV, we plan for 50-75 EV purchases in FY-22 and FY-23.
  - This is the total for all agencies included in this project at this time and does not reflect an individual agency's involvement.

# THE “WHY” - QUESTIONS

# THE “HOW”

---

- In FY-20, DBM began using Strategic Energy Investment Funds (SEIF) to supplement agency's existing general fund purchase funds in order to begin EV integration of the State's fleet.
  - MEA was authorized to transfer \$2.25M to DBM for EV Fleet integration purposes
  - 69 plug-in hybrids and 5 EVs were purchased and assigned to various agencies
- In FY-21, DBM, DGS, MEA and MDE and many other agencies established a work group to coordinate efforts toward EV integration. Responsibilities were assigned:
  - DBM is responsible for identifying vehicles within the State's fleet that could be replaced with an EV
  - DGS is responsible for pursuing charge station infrastructure commensurate with EV purchases.
  - MEA was identified as the primary funding source
  - MDE provided crucial EV data.
    - 40 EVs were purchased and will be arriving in early Fall 2021
    - Approximately \$1.2M of an allotted \$2.25M in SEIF was used.

# THE “HOW” (CONT’D)

---

- In FY-22 DBM has been authorized to use approximately \$3.4M in SEIF during FY-22.
  - This includes the yearly draw of \$2.25M and the unspent funds of \$1.2M from FY-21.
  - SEIF will be used to augment an agency’s existing new vehicle funding for vehicles identified on an agency’s FY-22 DA-8. If a vehicle designated by DBM for replacement with an EV is not on an agency’s FY-22 DA-8, the vehicle’s replacement cost will be funded entirely by SEIF.
  - The EV replacement list for FY-22 is near completion with the expectation that approximately 80 EVs will be purchased statewide.
  - It is anticipated that some portion of this funding will go to charge station infrastructure; however, the priority will be EV purchases.

# THE “HOW” (CONT’D)

---

- DBM Fleet will enter, approve and submit all program new vehicle purchase orders (PO).
  - If partially funded through SEIF, the agency will receive an invoice from DBM for the cost of an equivalent ICE vehicle.
  - If fully funded through SEIF, the agency will not be invoiced.
- Each PO will provide the address for vehicle delivery so that the vehicles are not delivered to DBM.
- Vehicle deliveries will be significantly delayed in FY-22 as the micro chip shortage and other supply issues have had a great impact on vehicle manufacturing. DBM expects a 6-8 month lag time between purchase or initiation and vehicle delivery.
- Until the final EV Replacement list is completed, no vehicle orders will be approved to insure the widest availability of vehicles scheduled for replacement will make the initial list.

# THE “HOW” (CONT’D)

---

- Which EVs to choose from
  - Current State contracts include the Chevrolet Bolt, the Nissan Leaf and the Ford Mustang Mach-E.
  - DBM elicits input from all of the major State departments with regard to developing the Statewide Vehicle Specifications that go before BPW yearly or bi-yearly. This insures the vehicle types that DBM asks to be put out for bid reflects the vehicles actually needed by State employees.
  - This an open solicitation to any manufacturer/dealer that can provide vehicles meeting DBM specifications.
  - Foreign and luxury brands generally have more EV offerings but do not respond to our solicitations. This limits the types of vehicles that DBM can provide.
  - New specifications will be developed for FY-23 and will be put out for bid by DGS in early July 2022.

# THE “HOW” - QUESTIONS

# THE “WHEN”

---

- This part is easy.....Now!
- As we discussed, the movement to fully integrate the State’s eligible fleet with EVs has already begun and will only pick up steam.

# 2022 Legislative Flyer

## Zero Emission Vehicles (ZEVs) in Maryland

The Maryland Greenhouse Gas Emissions Reduction Act Plan sets a goal of 50% greenhouse gas (GHG) emissions reductions by 2030. Transportation is the single largest GHG emissions generator in Maryland, representing 36% of total GHG emissions. ZEVs play an integral role in helping Maryland meet its emissions goal.

## Maryland ZEV Policy Scorecard

The ZEV market is rapidly advancing in part due to supportive state policy. Maryland has the opportunity to be a leader in ZEV market development but does not have the necessary policies in place. This scorecard outlines policy options that have been adopted across the United States to promote zero emission vehicles (ZEVs) adoption and ZEV recharging and refueling infrastructure.

State Policies to Support Electric Vehicle (EV) Deployment	Active in Maryland?	States with Active Policy
<b>Financial Incentives</b>		
Point-Of-Sale Rebates	No	CA, PA
Rebates for New EVs	No	CA, CO, CT, ME, MN, NJ, NY, OR, VT
Rebates for Used EVs	No	CA, CT, ME, MN, OR
Rebates or Grants for Infrastructure	Yes	42 States (including DC, DE, PA, and VA)
Grants for Emissions Reductions Technologies	No	CA, CT, DE, IL, IN, IA, LA, MA, ME, MI, MN, NC, NH, NV, OH, OR, SD, TX, UT, VA, VT, WI, WY
Tax Credit – EV Purchase	No	• Tax credits expired in 2021 CO, DC, LA, MT
Tax Credit – Infrastructure	No	DC, GA, LA, NY, OK, UT, WA
Tax Exemption for ZEVs and Infrastructure	No	AZ, CA, DC, MI, NJ, NC, OK, RI, UT, WA
ZEV Registration Fee Exemption	No	AZ, CT, OR
<b>Goals</b>		
State ZEV Adoption Goal	Yes	• 300,000 EVs registered by 2025 • 600,000 EVs registered by 2030 CA, CO, CT, MA, MN, NJ, NY, NC, OR, RI, VT, WA
Greenhouse Gas (GHG) Emission Reduction Target	Yes	• By 2030, 40% emissions reduction from 2006 levels • Greenhouse Gas Reduction Act CA, CO, CT, HI, MA, ME, MN, NV, NJ, NY, OR, RI, VT, WA, WA
Fleet Procurement Goal	Yes	• Maryland Green Purchasing CA, CT, IL, MN, NC, NH, OR, TN
Infrastructure Deployment Goal	Yes	• DGS is establishing a Statewide EV infrastructure Strategy CA, CO, CT, ME, MA, NJ, NY, OR, RI, VT
<b>Non-Financial Incentives and Supporting Legislation</b>		
HOV Lane Access	Yes	AZ, CA, GA, HI, NJ, NY, NC, UT, VA
Reserved Parking on Public Property	Varies	CA, MA, OR, WA
ZEV Infrastructure Multi-State Collaboration	Yes	• Medium- and Heavy-Duty ZEV MOU • Light-Duty Vehicle 2014 Multi-State Action Plan • Light-Duty Vehicle 2018-2021 Multi-State ZEV Action Plan AZ, CA, CO, CT, DC, DE, HI, ID, ME, MA, MT, NH, NJ, NM, NC, NV, NY, OK, OR, PA, RI, UT, VA, VT, WA, WY
ZEV Infrastructure Planning and Coordination	Yes	• Zero Emission Electric Vehicle Infrastructure Council CO, DC, NH, RI
ZEV Sales Requirements	Light-Duty Vehicles: Yes Medium- and Heavy-Duty Vehicles: No	• Adopted Title 13 of the California Code of Regulations CA, CO, CT, DC, DE, ME, MA, MN, NJ, NY, NV, OR, PA, RI, VT, VA, WA CA
EVSE or EVSE-Wiring Building Code Requirements	Partially	• House Bill 784, 2021, requires builders to provide the option for Level 2 EVSE prewiring CA, MA, NJ, OR, VA, WA
Direct-to-Public EV Sales	Yes	AK, AZ, CA, CO, DE, FL, HI, ID, IL, MA, ME, MN, MO, MS, NH, OR, RI, TN, UT, VT, WY
EVSE Electricity Sales Deregulated	Yes	AL, AZ, AK, CA, CO, CT, DE, DC, FL, HI, IA, IL, ID, KS, KY, ME, MA, MN, MO, MT, NV, NH, NJ, NM, NY, NC, ND, OH, OK, OR, PA, RI, SC, TX, UT, VT, WA, WV
Utility EVSE Programs	Yes	• PC44 EV Pilot Program AL, AK, AZ, CA, CO, CT, DC, DE, FL, GA, HI, ID, IN, IA, KS, LA, MA, ME, MI, MN, MS, MO, NE, NV, NH, NJ, NM, NY, NC, OH, OK, OR, RI, TN, TX, UT, VT, VA, WA, WI, WY, WY
Charging Signage Standardization	No	CA, NH, NY, ND, OH, SD, VA, WA
Right-Of-Way Charging	No	• Testing in Montgomery County CA
Streamline ZEV Infrastructure Permitting	No	CA
Define ZEV Zoning Requirements	No	
Right-To-Charge Requirements	Yes	CA, FL, HI, NJ, NY, VA

# ZEEVIC Purpose and Role

## ZEEVIC Purpose and Role

**What is ZEEVIC?** ZEEVIC is the Zero Emission Electric Vehicle Infrastructure Council.

### Who created ZEEVIC?

The Maryland Legislature created the Electric Vehicle Infrastructure Council (EVIC) in 2011 to address and remove barriers related to plug-in electric vehicle (PEV) adoption in Maryland. In 2019, the membership, responsibilities, and reporting requirements of EVIC was expanded to include zero emission vehicles (ZEVs) and fuel cell electric vehicles (FCEVs). To reflect the expanded responsibilities of the council, EVIC was renamed the Maryland Zero Emission Electric Vehicle Infrastructure Council (ZEEVIC).<sup>1</sup> In 2020, the membership of ZEEVIC was expanded further and the Council's termination date was extended to 2026.<sup>2</sup>

### What does ZEEVIC do?

The ZEEVIC is charged with the supporting the development of:

- Policies, recommendations, and incentives that increase awareness of ZEVs, support the ownership of ZEVs, and promote investment by the private sector in ZEVs;
- Recommendations for a statewide EV charging and hydrogen refueling infrastructure plan; and,
- Other potential policies to promote and facilitate the successful integration of ZEVs into Maryland's transportation network.

ZEEVIC's responsibilities are directly related to helping Maryland meeting greenhouse gas (GHG) emissions reductions goals outlined in the Greenhouse Gas Emissions Reduction Act (GGRA). The GGRA sets a goal of **50% GHG emissions reductions by 2030**. Because transportation is the single largest GHG emissions generator in Maryland, representing 36% of total GHG emissions, ZEVs play an integral role in helping Maryland meet the GGRA emissions reduction goal.

<sup>1</sup>Chapter 213, Acts of 2019  
<sup>2</sup>House Bill 232, 2020

### Who is part of ZEEVIC?

Name	Representing
R. Earl Lewis, Jr. Deputy Secretary	Maryland Department of Transportation (Council Chair)
Hyeon-Shic Shin, PhD., Morgan State University	Member from a Maryland Institution of Higher Education
Weston Young, Worcester County	Maryland Association of Counties—Rural Region
Liam Davis, Baltimore City Department of Transportation	Maryland Association of Counties—Urban or Suburban Region
Nina Forsythe, City of Frostburg	Maryland Municipal League—Rural Region
David Edmondson, City of Frederick	Maryland Municipal League—Urban or Suburban Region
Elvia Thompson, Annapolis Green	EV Driver Advocacy Organization
Kristy Fleischmann-Groncki, BGE	Electric Companies
Robert Stewart, PEPSCO Holdings, Inc.	
Jeff Shaw, SMECO	
Jason Tai, Tesla Consultant	Electric Vehicle Manufacturer
Kevin Miller, ChargePoint, Inc.	Electric Vehicle Charging Station Manufacturer
Robert Wimmer, Toyota	Fuel Cell Electric Vehicle Manufacturer
Joe Alfred, Ally Power Inc.	Fuel Cell Electric Vehicle Infrastructure Equipment Manufacturer
Vacant	Fleet Operators
Michael A. Wall, Clinton Electric Company	Electrical Workers
Scott Wilson, Electric Vehicle Association of Washington D.C.	Environmental Community
Vacant	
Paul Verchinski	Public with Expertise in Energy or Transportation Policy
Vacant	New Vehicle Dealer Association
Senator Clarence K. Lam, M.D., District 12 Baltimore and Howard Counties	State Senate
Delegate Tony Bridges, District 41 Baltimore City	House of Delegates
Delegate David Fraser-Hidalgo, District 15 Montgomery County	
Bihui Xu, Transportation Planning	Maryland Department of Planning
Benjamin Grumbles	Maryland Department of the Environment
Kelly Schulz	Maryland Department of Commerce
Kevin Moxier, Wholesales Markets Liaison	Staff of the Maryland Public Service Commission
Mike Jones, Transportation Program Manager	Maryland Energy Administration

### What are ZEEVIC's 2022 priorities?

Populate with 2022 priorities once created.

MDOT

# Registered EVs – at close of Fiscal Year

FY 21 concluded June 30, 2021:

- 35% increase in registered EVs since end of FY 20
  - 9,099 registered EVs

FY 22 has not concluded:

- Currently - 39,633 registered EVs
- 13.8% Growth since end of FY 21
  - 4,792 registered EVs

# EV Registration Growth in 2021

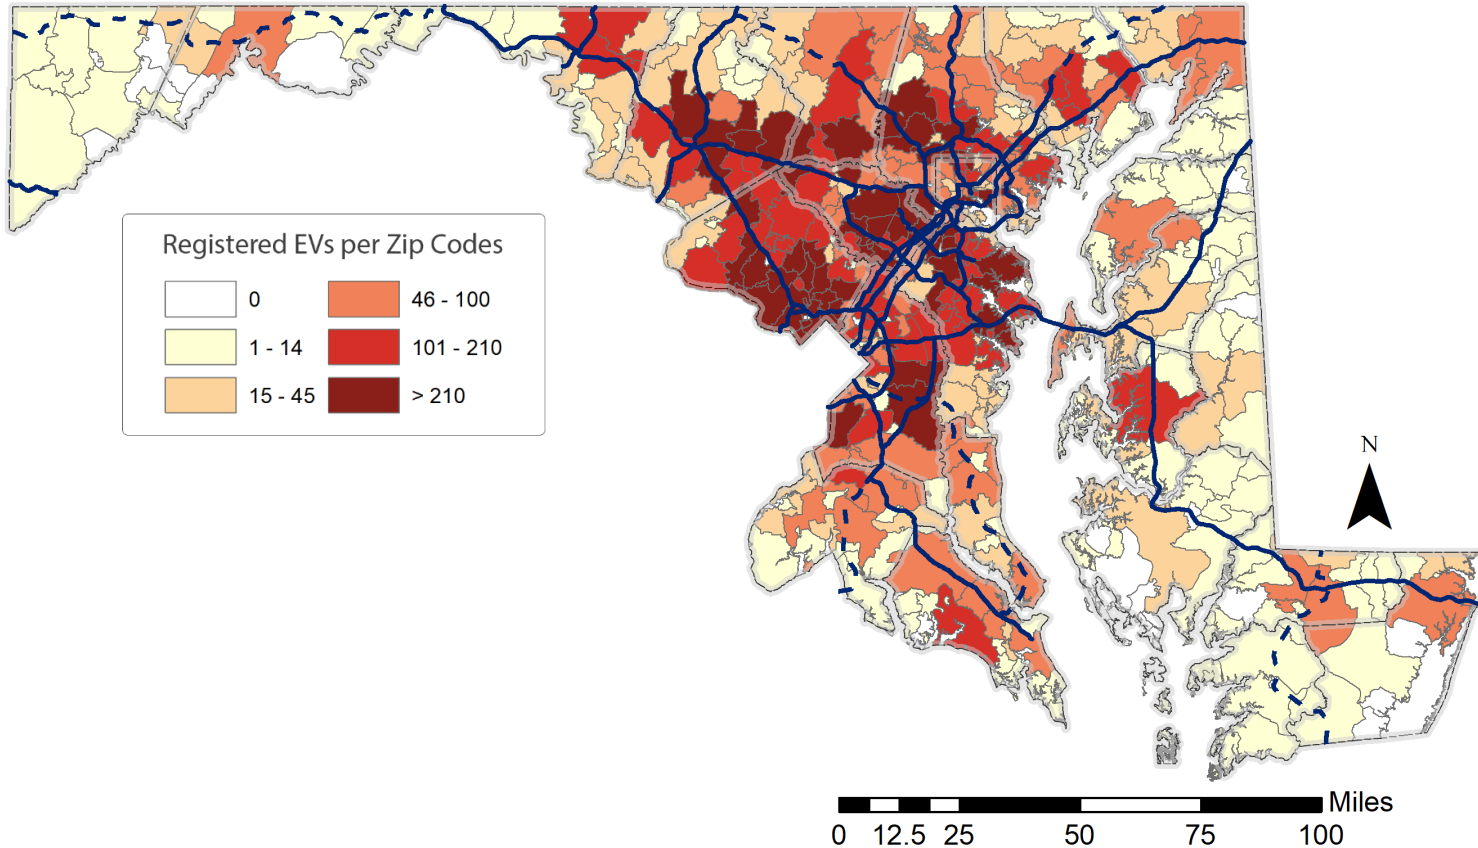

January 1, 2021 – November 1, 2021

Date	Total Registered EVs	EVs Registered	% Growth
January 1, 2021	29,268	-	-
February 1, 2021	29,939	671	2.3%
March 1, 2021	30,345	406	1.4%
April 1, 2021	31,161	816	2.7%
May 1, 2021	32,180	1,019	3.3%
June 1, 2021	33,170	990	3.1%
Start of FY 22 → July 1, 2021	34,841	1,671	5.0%
August 1, 2021	36,080	1,239	3.6%
September 1, 2021	37,432	1,352	3.7%
October 1, 2021	38,445	1,013	2.7%
November 1, 2021	39,633	1,188	3.1%

# Charging Network

# Charging Networks

As of November 1<sup>st</sup>:

- 1,081 Charging Stations
- 2,846 Charging Ports
  - 510 DC Fast
  - 2,315 Level 2
  - 21 Level 1

# State Agency Updates

# MDE Program Updates

---

## **Volkswagen Settlement Updates**

- MDE working to finalize all Agreements/MOUs, for both the CAGP and ECGP.
- Comment period closed for both the CACP and ECGP Program on September 30<sup>th</sup>. Received approximately 10 submissions with over 30 comments.
- MDE/MEA conducted meeting with all EVSE providers in the State to go over technologies, pricing, logistics etc..
- Goal is to open Round 2 of funding in December and leave open for approximately 3 months
- First electric school bus project completed (Frederick County).

# MEA Program Updates

---

- MEA has processed \$595,425 worth of rebates, totaling 578 chargers
  - \$284,353 for 493 residential EVSE
  - \$311,071 for 85 commercial EVSE
  - 2 energy specialists now on board, providing program support
- Clean Fuels Incentive Program (CFIP)
  - FY22 program opened 9/1, closes 12/31
  - Up to \$80K/vehicle for MHD BEVs, \$50K for MHD FCEVs
  - More time for project completion, equity now considered in evaluation criteria
- Clean Fuels Technical Assistance (CFTA) Program
  - Anne Arundel County final report finished, posted to MEA website
  - Still evaluating program and determining next steps

# Additional State Agencies

---

- MDOT
- MDP
- Commerce
- DGS

A stylized graphic in the top right corner shows two hands, one in red and one in white, holding a globe. The globe is composed of yellow, grey, and white segments. The hands are rendered in a simple, flat style.
